JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Acceptor concentration
Synthetic semiconductor diamond electrodes: determination of acceptor concentration by linear and non-linear impedance measurements (Pleskov et al.) 227
Adsorbed anions
Voltammetric study of underpotential deposition (upd) of Zn^{2+} ions on Pt(111): Effect of adsorbed anion (Taguchi, Aramata) 131
Alkanethiolates
Electrochemical and X-ray photoelectron spectroscopic evidence for differences in the binding sites of alkanethiolate monolayers chemisorbed at gold (Walczak et al.) 103
Amalgams
The relation between electrical double layer data and electronic work functions for amalgams (Koene et al.) 569
Ammonia
Voltammetry in the absence of a solution phase with solids prepared by a sol-gel process as the electrolytes: facilitation of an electrocatalytic anodic process in the presence of ammonia (Cox et al.) 485
Anodic behavior
Selective formation of β-PbO and α-PbO films on Pb electrodes by potentiostatic anodization in alkaline solutions (Veluchamy, Minoura) 211
Aqueous electrolytes
Diffusion coefficients of dioxygen in aqueous electrolyte solutions (Ikeuchi et al.) 553
Assisted ion transfer
Cyclic voltammetry for assisted ion transfer at an ITIES (Beattie et al.) 317
Au
Electrochemical and X-ray photoelectron spectroscopic evidence for differences in the binding sites of alkanethiolate monolayers chemisorbed at gold (Walczak et al.) 103

Bath deposition
Chemical bath deposition of CdSe layers from Cd(II)-selenosulfite solutions (Cachet et al.) 175
Binary metal system
Chronoamperometry for the determination of metallic interdiffusion coefficients. Rapid transport processes in the first atomic layers (Lantelme, Chemla) 203
Binding sites
Electrochemical and X-ray photoelectron spectroscopic evidence for differences in the binding sites of alkanethiolate monolayers chemisorbed at gold (Walczak et al.) 103
Bioelectrocatalysis
Reactions between diaphorase and quinone compounds in bioelectrocatalytic redox reactions of NADH and NAD^+ (Ogino et al.) 517
Boron doping
Efficient reduction of nitrite and nitrate to ammonia using thin-film B-doped diamond electrodes (Reuben et al.) 233
Bromine adsorption
In-situ scanning tunneling microscopy of bromine adlayers on Pt(111) (Tanaka et al.) 125

Caesium chloride
The Chemla effect in the mobilities in the molten binary system of lithium chloride and caesium chloride (Okada, Horinouchi) 547
Calix[4]arenediquinones
Electrochemical behavior of calix[4]arenediquinones and their cation binding properties (Chung et al.) 431
Carbon fibres
Surface modification of pitch-based carbon fibre for the improvement of electrochemical lithium intercalation (Kikuchi et al.) 451
Cation-binding ligands
Electrochemical behavior of calix[4]arenediquinones and their cation binding properties (Chung et al.) 431
Charged particle transfer
Equations of motion for a classical charged particle in a polar medium (Kuznetsov, Krishtalik) 251
Charge transfer
Diffusion to rough interfaces: finite charge transfer rates (Kant, Rangarajan) 285
Chemla effect
The Chemla effect in the mobilities in the molten binary system of lithium chloride and caesium chloride (Okada, Horinouchi) 547
Chloranilic acid
Conductometric determination of thermodynamic successive ionization constants of chloranilic acid (Kato et al.) 557
Chromium amalgam
Kinetics and mechanism of the electrode reactions of the $Cr^{2+}/Cr(Hg)$ system in moderately concentrated lithium iodide, chloride and perchlorate solutions (Marczak et al.) 419
Chronoamperometry
Chronoamperometry for the determination of metallic interdiffusion coefficients. Rapid transport processes in the first atomic layers (Lantelme, Chemla) 203
CO_2
Poisoning of surface hydrogen processes on a Pd electrode during electrochemical reduction of carbon dioxide (Yoshitake et al.) 491
Concentration effects
Electrochemiluminescence in low ionic strength solutions of 1,2-dimethoxyethane (Maness, Wightman) 85
Controlled potential coulometry
Electrochemical reactions of some dimethyl dialkylaminomaleates (Hu et al.) 457
Copper
Influence of underpotential deposition of copper with submonolayer coverage on hydrogen adsorption at the stepped surfaces Pt(955), Pt(322) and Pt(544) in sulfuric acid solution (Nishihara, Nozoye) 139
Copper selenides
Photoelectrochemical responses of orthorhombic and cubic copper selenides (Haram, Santhanam) 63
CO_2 reduction
Photocatalytic reduction of CO_2 with H_2O on various titanium oxide catalysts (Anpo et al.) 21
Crystallographic phase
Photoelectrochemical responses of orthorhombic and cubic copper selenides (Haram, Santhanam) 63

Cu deposition
Cu deposition onto n-GaAs(100): optical and current transient studies (Scherb, Kolb) 151
Cyclic voltammetric responses
Calculation of cyclic voltammetric responses for the reduction of substrates by an inner-sphere mechanism at electrode surfaces with single monolayers of catalysts (Xie, Anson) 441
Cyclic voltammetry
Cyclic voltammetry for assisted ion transfer at an ITIES (Beattie et al.) 317
Memory effects in polyaniline in mixed solvents (Tang et al.) 377
Electrochemical reactions of some dimethyl dialkylaminomaleates (Hu et al.) 457

Debye media
Equations of motion for a classical charged particle in a polar medium (Kuznetsov, Krishtalik) 251
Deuterium hydroxide
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
[Diamine-N,N-polycarboxylato]chromium(III)complexes
Solvent effects in the electroreduction of [diamine-*N*,*N*′-polycarboxylato]chromate(III) complexes at a mercury electrode (Hecht, Fawcett) 473
Diamond electrodes
Efficient reduction of nitrite and nitrate to ammonia using thin-film B-doped diamond electrodes (Reuben et al.) 233
Diffuse-layer effects
Effect of diffuse layer on the rate of electron transfer across an electrolyte|electrolyte solution interface (Katano et al.) 391
Diffusion
Diffusion to rough interfaces: finite charge transfer rates (Kant, Rangarajan) 285
Diffusion coefficients
Diffusion coefficients of dioxygen in aqueous electrolyte solutions (Ikeuchi et al.) 553
Digital simulation
The effects of uncompensated solution resistance and rate of the homogeneous electron transfer reaction on electrochemiluminescence transients (Rosenmund, Doblhofer) 77
1,2-Dimethoxyethane
Electrochemiluminescence in low ionic strength solutions of 1,2-dimethoxyethane (Maness, Wightman) 85
Dimethyl dialkylaminomaleates
Electrochemical reactions of some dimethyl dialkylaminomaleates (Hu et al.) 457
Dioxygen
Diffusion coefficients of dioxygen in aqueous electrolyte solutions (Ikeuchi et al.) 553
Dithiolatocobalt complexes
Electro-oxidative and electro-reductive dissociation of adducts between (η5-cyclopentadienyl) (1,2-disubstituted 1,2-ethylenedithiolato) cobalt (III) complexes and tributylphosphane or tributyl phosphite (Shimizu et al.) 465
Doped semiconductors
A generalized theory of intensity modulated photocurrent spectroscopy (IMPS) (Ponomarev, Peter) 219

Effective Hamiltonian method
Equations of motion for a classical charged particle in a polar medium (Kuznetsov, Krishtalik) 251
Electric storage devices
On the use of ionically conducting membranes for the fabrication of laminated polymer-based redox capacitors (Panero et al.) 385
Electroactivity
Dependence of swelling behaviour and electrochemical activity of water-soluble polythiophene films on the nature of the electrolyte (Tatsuma et al.) 371
Electrocatalysts
Electrochemical surface characterization of $IrO_2 + SnO_2$ mixed oxide electrocatalysts (De Pauli, Trasatti) 161
Electrochemical dissociation
Electro-oxidative and electro-reductive dissociation of adducts between (η5-cyclopentadienyl) (1,2-disubstituted 1,2-ethylenedithiolato) cobalt (III) complexes and tributylphosphane or tributyl phosphite (Shimizu et al.) 465
Electrochemical measurement
Electrochemical methods for analysis of the thickness of thin alternating metal layers (Kazarinov et al.) 197
Electrochemiluminescence
Electrochemiluminescence in low ionic strength solutions of 1,2-dimethoxyethane (Maness, Wightman) 85
Electrochemiluminescence transient
The effects of uncompensated solution resistance and rate of the homogeneous electron transfer reaction on electrochemiluminescence transients (Rosenmund, Doblhofer) 77
Electrodeposition
Impedance measurements of ionic conductivity as a probe of structure in electrochemically deposited polypyrrole films (Ren, Pickup) 359
Electrode processes
Kinetics and mechanism of the electrode reactions of the $Cr^{2+}/Cr(Hg)$ system in moderately concentrated lithium iodide, chloride and perchlorate solutions (Marczak et al.) 419
Electroluminescence
Control of the porous structure of n-type silicon and its electroluminescence properties (Osaka et al.) 69
Electrolyte|electrolyte solution interface
Effect of diffuse layer on the rate of electron transfer across an electrolyte|electrolyte solution interface (Katano et al.) 391
Electronic work function
The relation between electrical double layer data and electronic work functions for amalgams (Koene et al.) 569
Electron transfer
Effect of diffuse layer on the rate of electron transfer across an electrolyte|electrolyte solution interface (Katano et al.) 391
Electron transfer reaction
The effects of uncompensated solution resistance and rate of the homogeneous electron transfer reaction on electrochemiluminescence transients (Rosenmund, Doblhofer) 77
Electron tunnelling
A model for the effective barrier height observed with a scanning tunneling microscope (Pecina et al.) 303
Electroreduction
Reduction of NO on Au single-crystal electrodes in alkaline solution (Suzuki et al.) 143
Efficient reduction of nitrite and nitrate to ammonia using thin-film B-doped diamond electrodes (Reuben et al.) 233
Solvent effects in the electroreduction of [diamine-*N*,*N*′-polycarboxylato]chromate(III) complexes at a mercury electrode (Hecht, Fawcett) 473
Polarographic and electrochemical studies of some aromatic and heterocyclic nitro compounds. Part 9. Substituent effects on protonation of the radical $ArNO_2H^{\bullet}$ and its reactions with hydroxylamino and nitroso compounds in buffered mixtures of water and DMF (Karakus, Zuman) 499
Electroreflectance spectroscopy
An electroreflectance study of novel hemin-imidazole complexes at a pyrolytic graphite electrode (Sagara et al.) 525
Electrostatic Kerr effect
Electrostatic Kerr effect at a potentiostatically controlled liquid|liquid interface (Nakabayashi et al.) 397
Equations of motion
Equations of motion for a classical charged particle in a polar medium (Kuznetsov, Krishtalik) 251

Film swelling
Dependence of swelling behaviour and electrochemical activity of water-soluble polythiophene films on the nature of the electrolyte (Tatsuma et al.) 371
Flow injection analysis
Electrochemical detection in flow injection analysis for determining serum lipase activity (Takamura et al.) 507
Free convection
Transport phenomena and growth modes of silver electrodeposits (Carro et al.) 183

Gallium arsenide
Cu deposition onto n-GaAs(100): optical and current transient studies (Scherb, Kolb) 151
Glassy carbon
Effect of target temperature during nitrogen ion implantation on electrochemical properties of ion-implanted glassy carbon (Takahashi et al.) 541
Glucose oxidase
"Wiring" of glucose oxidase within a hydrogel made with polyvinyl imidazole complexed with [(Os-4,4′-dimethoxy-2,2′-bipyridine)-Cl]$^{+/2+}$ (Taylor et al.) 511
Gold electrodes
Reduction of NO on Au single-crystal electrodes in alkaline solution (Suzuki et al.) 143

Hemin-imidazole complexes
An electroreflectance study of novel hemin-imidazole complexes at a pyrolytic graphite electrode (Sagara et al.) 525
Hemispherical microelectrodes
The steady state at a pair of hemispherical microelectrodes (Alfred, Oldham) 257
Heteropolymolybdate
Redox and electroinsertion processes associated with the voltammetry of microcrystalline forms of Dawson molybdate anion salts mechanically attached to graphite electrodes and immersed in aqueous electrolyte media (Bond et al.) 407
Hydrogen adsorption
Influence of underpotential deposition of copper with submonolayer coverage on hydrogen adsorption at the stepped surfaces Pt(955), Pt(322) and Pt(544) in sulfuric acid solution (Nishihara, Nozoye) 139
Hydrogen storage materials
Electrochemical measurements of single particles of Pd and $LaNi_5$ with a microelectrode technique (Ura et al.) 169
Hydrophilic crown ethers
On the facilitating effect of neutral macrocyclic ligands on ion transfer across the interface between aqueous and organic solutions. II: Alkali metal ion complexes with hydrophilic crown ethers (Kudo et al.) 333
Hydroxylamino compounds
Polarographic and electrochemical studies of some aromatic and heterocyclic nitro compounds. Part 9. Substituent effects on protonation of the radical $ArNO_2H^{\bullet}$ and its reactions with hydroxylamino and nitroso compounds in buffered mixtures of water and DMF (Karakus, Zuman) 499

Immiscible solutions
Electrostatic Kerr effect at a potentiostatically controlled liquid|liquid interface (Nakabayashi et al.) 397
Impedance measurements
Synthetic semiconductor diamond electrodes: determination of acceptor concentration by linear and non-linear impedance measurements (Pleskov et al.) 227
Impedance spectra
Impedance measurements of ionic conductivity as a probe of structure in electrochemically deposited polypyrrole films (Ren, Pickup) 359
In-situ scanning tunnelling microscopy
In-situ scanning tunneling microscopy of bromine adlayers on Pt(111) (Tanaka et al.) 125
Integral equation method
An integral equation method for computing the transient current at microelectrodes (Cope, Tallman) 265
Intensity modulated photocurrent spectroscopy
A generalized theory of intensity modulated photocurrent spectroscopy (IMPS) (Ponomarev, Peter) 219
Interaction energies
Redox interaction of star-burst tetranuclear complex (Aoki et al.) 309
Intercalation
Surface modification of pitch-based carbon fibre for the improvement of electrochemical lithium intercalation (Kikuchi et al.) 451
Interdiffusion coefficient
Chronoamperometry for the determination of metallic interdiffusion coefficients. Rapid transport processes in the first atomic layers (Lantelme, Chemla) 203
Interfaces
Electrostatic Kerr effect at a potentiostatically controlled liquid|liquid interface (Nakabayashi et al.) 397
Interfacial geometry
Diffusion to rough interfaces: finite charge transfer rates (Kant, Rangarajan) 285
Ionic conductivity
Impedance measurements of ionic conductivity as a probe of structure in electrochemically deposited polypyrrole films (Ren, Pickup) 359
Ionic conductors
On the use of ionically conducting membranes for the fabrication of laminated polymer-based redox capacitors (Panero et al.) 385
Ionic mobility
The Chemla effect in the mobilities in the molten binary system of lithium chloride and caesium chloride (Okada, Horinouchi) 547
Ion implantation
Effect of target temperature during nitrogen ion implantation on electrochemical properties of ion-implanted glassy carbon (Takahashi et al.) 541
Ionization constants
Conductometric determination of thermodynamic successive ionization constants of chloranilic acid (Kato et al.) 557
Ion transfer
On the facilitating effect of neutral macrocyclic ligands on ion transfer across the interface between aqueous and organic solutions. II: Alkali metal ion complexes with hydrophilic crown ethers (Kudo et al.) 333
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
$IrO_2 + SnO_2$
Electrochemical surface characterization of $IrO_2 + SnO_2$ mixed oxide electrocatalysts (De Pauli, Trasatti) 161
ITIES
Cyclic voltammetry for assisted ion transfer at an ITIES (Beattie et al.) 317

$LaNi_5$ particles
Electrochemical measurements of single particles of Pd and $LaNi_5$ with a microelectrode technique (Ura et al.) 169
Li batteries
Surface modification of pitch-based carbon fibre for the improvement of electrochemical lithium intercalation (Kikuchi et al.) 451
Liquid|liquid interface
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
Lithium chloride
The Chemla effect in the mobilities in the molten binary system of lithium chloride and caesium chloride (Okada, Horinouchi) 547

Lithium salts
Kinetics and mechanism of the electrode reactions of the $Cr^{2+}/Cr(Hg)$ system in moderately concentrated lithium iodide, chloride and perchlorate solutions (Marczak et al.) 419

Macrocyclic ligands
On the facilitating effect of neutral macrocyclic ligands on ion transfer across the interface between aqueous and organic solutions. II: Alkali metal ion complexes with hydrophilic crown ethers (Kudo et al.) 333
Mathematical model
A generalized theory of intensity modulated photocurrent spectroscopy (IMPS) (Ponomarev, Peter) 219
A model for the effective barrier height observed with a scanning tunneling microscope (Pecina et al.) 303
Cyclic voltammetry for assisted ion transfer at an ITIES (Beattie et al.) 317
Effects of ohmic resistance on the evaluation of faradaic charge in thin films of redox materials by impedance and voltammetry (Bernard et al.) 325
Mathematical models
AC voltammetry at microcylinder electrodes (Tokuda et al.) 365
Memory effect
Memory effects in polyaniline in mixed solvents (Tang et al.) 377
Mercury electrode
Solvent effects in the electroreduction of [diamine-*N,N'*-polycarboxylato]chromate(III) complexes at a mercury electrode (Hecht, Fawcett) 473
Microelectrochemistry
Electrochemical measurements of single particles of Pd and $LaNi_5$ with a microelectrode technique (Ura et al.) 169
Microelectrode array
Preparation of a microelectrode array by photo-induced elimination of a self-assembled monolayer of hexadecylthiolate on a gold electrode (Ohtani et al.) 97
Microelectrodes
An integral equation method for computing the transient current at microelectrodes (Cope, Tallman) 265
Electrochemical behaviour of V-groove microelectrodes fabricated by micromachining (Shibuya et al.) 535
Microwave reflectivity
A generalized theory of intensity modulated photocurrent spectroscopy (IMPS) (Ponomarev, Peter) 219
Mixed solvents
Memory effects in polyaniline in mixed solvents (Tang et al.) 377
Mixed-valence state
Redox interaction of star-burst tetranuclear complex (Aoki et al.) 309
Molten salt
The Chemla effect in the mobilities in the molten binary system of lithium chloride and caesium chloride (Okada, Horinouchi) 547
Morphological stability
Morphological pattern formation in pitting corrosion (Asanuma, Aogaki) 241
Morphology
Electrochemical surface characterization of $IrO_2 + SnO_2$ mixed oxide electrocatalysts (De Pauli, Trasatti) 161
Mott–Schottky plots
Photoelectrochemical responses of orthorhombic and cubic copper selenides (Haram, Santhanam) 63

Nitrate
Efficient reduction of nitrite and nitrate to ammonia using thin-film B-doped diamond electrodes (Reuben et al.) 233
Nitrite
Efficient reduction of nitrite and nitrate to ammonia using thin-film B-doped diamond electrodes (Reuben et al.) 233
Nitrobenzene
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
Nitroso conpounds
Polarographic and electrochemical studies of some aromatic and heterocyclic nitro compounds. Part 9. Substituent effects on protonation of the radical $ArNO_2H^{\cdot}$ and its reactions with hydroxylamino and nitroso compounds in buffered mixtures of water and DMF (Karakus, Zuman) 499
Nitrous oxide
Reduction of NO on Au single-crystal electrodes in alkaline solution (Suzuki et al.) 143
Numerical methods
Cyclic voltammetry for assisted ion transfer at an ITIES (Beattie et al.) 317

Ohmic drop
The effects of uncompensated solution resistance and rate of the homogeneous electron transfer reaction on electrochemiluminescence transients (Rosenmund, Doblhofer) 77
Optical beam deflection
Characterization of the redox processes of poly(thiophene-3-methanol) by voltammetry, in situ optical beam deflection and Fourier transform IR techniques (Pohjakallio et al.) 339

Pb electrodes
Selective formation of β-PbO and α-PbO films on Pb electrodes by potentiostatic anodization in alkaline solutions (Veluchamy, Minoura) 211
Pd electrode
Poisoning of surface hydrogen processes on a Pd electrode during electrochemical reduction of carbon dioxide (Yoshitake et al.) 491
Pd particles
Electrochemical measurements of single particles of Pd and $LaNi_5$ with a microelectrode technique (Ura et al.) 169
Phase transitions
Voltammetric study of underpotential deposition (upd) of Zn^{2+} ions on Pt(111): Effect of adsorbed anion (Taguchi, Aramata) 131
Photocatalysis
Photocatalytic reduction of CO_2 with H_2O on various titanium oxide catalysts (Anpo et al.) 21
Photochemistry
A generalized theory of intensity modulated photocurrent spectroscopy (IMPS) (Ponomarev, Peter) 219
Photodegradation
Photoelectrochemical studies pertaining to the activity of TiO_2 towards photodegradation of organic compounds (Wahl et al.) 41
Photoelectrolysis
Synergetic molecular approaches towards artificial and photosynthetic water photoelectrolysis (Tributsch, Pohlmann) 53
Photo-induced elimination
Preparation of a microelectrode array by photo-induced elimination of a self-assembled monolayer of hexadecylthiolate on a gold electrode (Ohtani et al.) 97
Photoluminescence
Photo-oxidation reaction of water on an n-TiO_2 electrode. Improvement in efficiency through formation of surface micropores by photoetching in H_2SO_4 (Nakato et al.) 35
Photo-oxidation reaction
Photo-oxidation reaction of water on an n-TiO_2 electrode. Improvement in efficiency through formation of surface micropores by photoetching in H_2SO_4 (Nakato et al.) 35
Photoresponse
Photoelectrochemical responses of orthorhombic and cubic copper selenides (Haram, Santhanam) 63
Piezoelectric crystal
A selective gas sensor using a polypyrrole thin film as a sensitive matrix on a piezoelectric crystal (Nigorikawa et al.) 563
Pitting corrosion
Morphological pattern formation in pitting corrosion (Asanuma, Aogaki) 241

Platinum
Influence of underpotential deposition of copper with submonolayer coverage on hydrogen adsorption at the stepped surfaces Pt(955), Pt(322) and Pt(544) in sulfuric acid solution (Nishihara, Nozoye) 139
Poisoning
Poisoning of surface hydrogen processes on a Pd electrode during electrochemical reduction of carbon dioxide (Yoshitake et al.) 491
Polar medium
Equations of motion for a classical charged particle in a polar medium (Kuznetsov, Krishtalik) 251
Polarography
Diffusion coefficients of dioxygen in aqueous electrolyte solutions (Ikeuchi et al.) 553
Pollution control
Reduction of NO on Au single-crystal electrodes in alkaline solution (Suzuki et al.) 143
Polyaniline
Memory effects in polyaniline in mixed solvents (Tang et al.) 377
Polymer membranes
On the use of ionically conducting membranes for the fabrication of laminated polymer-based redox capacitors (Panero et al.) 385
Polypyrrole films
Impedance measurements of ionic conductivity as a probe of structure in electrochemically deposited polypyrrole films (Ren, Pickup) 359
Polypyrrole thin film
A selective gas sensor using a polypyrrole thin film as a sensitive matrix on a piezoelectric crystal (Nigorikawa et al.) 563
Polythiophene films
Dependence of swelling behaviour and electrochemical activity of water-soluble polythiophene films on the nature of the electrolyte (Tatsuma et al.) 371
Poly(thiophene-3-methanol)
Characterization of the redox processes of poly(thiophene-3-methanol) by voltammetry, in situ optical beam deflection and Fourier transform IR techniques (Pohjakallio et al.) 339
Polyvinyl imidazole
"Wiring" of glucose oxidase within a hydrogel made with polyvinyl imidazole complexed with [(Os-4,4′-dimethoxy-2,2′-bipyridine)-Cl]$^{+/2+}$ (Taylor et al.) 511
Porous silicon
Control of the porous structure of n-type silicon and its electroluminescence properties (Osaka et al.) 69
Protonation
Polarographic and electrochemical studies of some aromatic and heterocyclic nitro compounds. Part 9. Substituent effects on protonation of the radical $ArNO_2H^{\cdot}$ and its reactions with hydroxylamino and nitroso compounds in buffered mixtures of water and DMF (Karakus, Zuman) 499
Pt(111)
Voltammetric study of underpotential deposition (upd) of Zn^{2+} ions on Pt(111): Effect of adsorbed anion (Taguchi, Aramata) 131
Pt substrate
Transport phenomena and growth modes of silver electrodeposits (Carro et al.) 183
Pt(111) surfaces
In-situ scanning tunneling microscopy of bromine adlayers on Pt(111) (Tanaka et al.) 125
Pyrolytic graphite electrode
An electroreflectance study of novel hemin-imidazole complexes at a pyrolytic graphite electrode (Sagara et al.) 525

Quartz crystal microbalance
Chemical bath deposition of CdSe layers from Cd(II)-selenosulfite solutions (Cachet et al.) 175

Random surface model
Diffusion to rough interfaces: finite charge transfer rates (Kant, Rangarajan) 285

Reaction kinetics
Kinetics and mechanism of the electrode reactions of the $Cr^{2+}/Cr(Hg)$ system in moderately concentrated lithium iodide, chloride and perchlorate solutions (Marczak et al.) 419
Redox
Reactions between diaphorase and quinone compounds in bioelectrocatalytic redox reactions of NADH and NAD^+ (Ogino et al.) 517
Redox capacitors
On the use of ionically conducting membranes for the fabrication of laminated polymer-based redox capacitors (Panero et al.) 385
Redox cycling
Electrochemical behaviour of V-groove microelectrodes fabricated by micromachining (Shibuya et al.) 535
Redox films
Effects of ohmic resistance on the evaluation of faradaic charge in thin films of redox materials by impedance and voltammetry (Bernard et al.) 325
Redox interaction
Redox interaction of star-burst tetranuclear complex (Aoki et al.) 309
Redox processes of solids
Redox and electroinsertion processes associated with the voltammetry of microcrystalline forms of Dawson molybdate anion salts mechanically attached to graphite electrodes and immersed in aqueous electrolyte media (Bond et al.) 407
Redox reactions
Electrochemical behavior of calix[4]arenediquinones and their cation binding properties (Chung et al.) 431
Reduction
Calculation of cyclic voltammetric responses for the reduction of substrates by an inner-sphere mechanism at electrode surfaces with single monolayers of catalysts (Xie, Anson) 441
Reflectance spectroscopy
Cu deposition onto n-GaAs(100): optical and current transient studies (Scherb, Kolb) 151
Ring-like microelectrode
The steady-state current for a ring-like microelectrode under non-diffusion-controlled conditions (Phillips, Stone) 277
Roughness effects
Diffusion to rough interfaces: finite charge transfer rates (Kant, Rangarajan) 285

Scanning tunnelling microscopy
A model for the effective barrier height observed with a scanning tunneling microscope (Pecina et al.) 303
Second harmonic generation
Electrochemical and second harmonic generation study of SO_4^{2-} adsorption at the Au(111) electrode (Shi et al.) 115
Selective gas sensor
A selective gas sensor using a polypyrrole thin film as a sensitive matrix on a piezoelectric crystal (Nigorikawa et al.) 563
Self-assembled monolayer
Preparation of a microelectrode array by photo-induced elimination of a self-assembled monolayer of hexadecylthiolate on a gold electrode (Ohtani et al.) 97
Sensitive matrix
A selective gas sensor using a polypyrrole thin film as a sensitive matrix on a piezoelectric crystal (Nigorikawa et al.) 563
Serum lipase
Electrochemical detection in flow injection analysis for determining serum lipase activity (Takamura et al.) 507
Silver electrodeposits
Transport phenomena and growth modes of silver electrodeposits (Carro et al.) 183
SO_4^{2-} adsorption
Electrochemical and second harmonic generation study of SO_4^{2-} adsorption at the Au(111) electrode (Shi et al.) 115
Sol-gel
Voltammetry in the absence of a solution phase with solids prepared

by a sol-gel process as the electrolytes: facilitation of an electrocatalytic anodic process in the presence of ammonia (Cox et al.) 485
Solvent effects
Solvent effects in the electroreduction of [diamine-*N,N'*-polycarboxylato]chromate(III) complexes at a mercury electrode (Hecht, Fawcett) 473
Sphere-cap
The steady state at a pair of hemispherical microelectrodes (Alfred, Oldham) 257
Steady-state current
The steady-state current for a ring-like microelectrode under non-diffusion-controlled conditions (Phillips, Stone) 277
Stepped surfaces
Influence of underpotential deposition of copper with submonolayer coverage on hydrogen adsorption at the stepped surfaces Pt(955), Pt(322) and Pt(544) in sulfuric acid solution (Nishihara, Nozoye) 139
Structural analysis
Impedance measurements of ionic conductivity as a probe of structure in electrochemically deposited polypyrrole films (Ren, Pickup) 359
Substituent effects
Polarographic and electrochemical studies of some aromatic and heterocyclic nitro compounds. Part 9. Substituent effects on protonation of the radical $ArNO_2H^{\cdot}$ and its reactions with hydroxylamino and nitroso compounds in buffered mixtures of water and DMF (Karakus, Zuman) 499
Surface characteristics
Electrochemical surface characterization of $IrO_2 + SnO_2$ mixed oxide electrocatalysts (De Pauli, Trasatti) 161
Surface hydrogen
Poisoning of surface hydrogen processes on a Pd electrode during electrochemical reduction of carbon dioxide (Yoshitake et al.) 491
Surface micropores
Photo-oxidation reaction of water on an n-TiO_2 electrode. Improvement in efficiency through formation of surface micropores by photoetching in H_2SO_4 (Nakato et al.) 35
Surface structure
Effect of target temperature during nitrogen ion implantation on electrochemical properties of ion-implanted glassy carbon (Takahashi et al.) 541
Surface structure effects
Reduction of NO on Au single-crystal electrodes in alkaline solution (Suzuki et al.) 143
Synergy
Synergetic molecular approaches towards artificial and photosynthetic water photoelectrolysis (Tributsch, Pohlmann) 53
Synthetic semiconductor diamond electrodes
Synthetic semiconductor diamond electrodes: determination of acceptor concentration by linear and non-linear impedance measurements (Pleskov et al.) 227

Temperature effects
Effect of target temperature during nitrogen ion implantation on electrochemical properties of ion-implanted glassy carbon (Takahashi et al.) 541
Tetraethylammonium ion
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
Tetranuclear complexes
Redox interaction of star-burst tetranuclear complex (Aoki et al.) 309
Tetrathiafulvalene
Synthesis and voltammetry of a tetrathiafulvalene polymer electrolyte melt (Velázquez, Murray) 349
Thermal decomposition
Electrochemical surface characterization of $IrO_2 + SnO_2$ mixed oxide electrocatalysts (De Pauli, Trasatti) 161
Thermodynamics
Conductometric determination of thermodynamic successive ionization constants of chloranilic acid (Kato et al.) 557
Thickness analysis
Electrochemical methods for analysis of the thickness of thin alternating metal layers (Kazarinov et al.) 197
Thin alternating metal layers
Electrochemical methods for analysis of the thickness of thin alternating metal layers (Kazarinov et al.) 197
Thin-layer spectroelectrochemistry
Electro-oxidative and electro-reductive dissociation of adducts between (η5-cyclopentadienyl) (1,2-disubstituted 1,2-ethylenedithiolato) cobalt (III) complexes and tributylphosphane or tributyl phosphite (Shimizu et al.) 465
TiO_2
Photoelectrochemical studies pertaining to the activity of TiO_2 towards photodegradation of organic compounds (Wahl et al.) 41
n-TiO_2 electrode
Photo-oxidation reaction of water on an n-TiO_2 electrode. Improvement in efficiency through formation of surface micropores by photoetching in H_2SO_4 (Nakato et al.) 35
Titanium oxide
Photocatalytic reduction of CO_2 with H_2O on various titanium oxide catalysts (Anpo et al.) 21

Uncompensated solution resistance
The effects of uncompensated solution resistance and rate of the homogeneous electron transfer reaction on electrochemiluminescence transients (Rosenmund, Doblhofer) 77
Underpotential deposition
Voltammetric study of underpotential deposition (upd) of Zn^{2+} ions on Pt(111): Effect of adsorbed anion (Taguchi, Aramata) 131
Influence of underpotential deposition of copper with submonolayer coverage on hydrogen adsorption at the stepped surfaces Pt(955), Pt(322) and Pt(544) in sulfuric acid solution (Nishihara, Nozoye) 139

Viscosity
Effect of the viscosity of the aqueous phase on the rate of ion transfer across the nitrobenzene|water interface (Kakiuchi, Teranishi) 401
Voltammetric studies
Voltammetry in the absence of a solution phase with solids prepared by a sol-gel process as the electrolytes: facilitation of an electrocatalytic anodic process in the presence of ammonia (Cox et al.) 485
Voltammetry
Redox and electroinsertion processes associated with the voltammetry of microcrystalline forms of Dawson molybdate anion salts mechanically attached to graphite electrodes and immersed in aqueous electrolyte media (Bond et al.) 407

Water
Photo-oxidation reaction of water on an n-TiO_2 electrode. Improvement in efficiency through formation of surface micropores by photoetching in H_2SO_4 (Nakato et al.) 35
Synergetic molecular approaches towards artificial and photosynthetic water photoelectrolysis (Tributsch, Pohlmann) 53

XPS
Electrochemical and X-ray photoelectron spectroscopic evidence for differences in the binding sites of alkanethiolate monolayers chemisorbed at gold (Walczak et al.) 103

Zinc deposition
Voltammetric study of underpotential deposition (upd) of Zn^{2+} ions on Pt(111): Effect of adsorbed anion (Taguchi, Aramata) 131
